pmid Sometimes more is not always better: ScvO₂ monitoring in pediatric sepsis

MD Taylor, SM Tobey - 2020 - Springer

Continuous central venous oxygen saturation (ScvO₂) monitoring became standard of care in adult septic shock following Rivers' 2001 study on goal-directed therapy [7]. Over the subsequent decade, care in adult sepsis improved significantly to the point where large ...

pmid Comparison of Intermittent versus Continuous Superior Vena Caval Oxygen Saturation Monitoring in Early Goal Directed Therapy in Septic Shock: A ...

doi Sankar, BH Das, UV Kumar - Journal of Pediatric Intensive Care ..., 2021 - theme-connect.com

Early goal directed therapy (EGDT) is a bundle of care (monitoring ScvO₂ and lactate along with clinical parameters and instituting therapy) that has shown to improve outcomes in patients with septic shock. We conducted a systematic review of clinical trials and ...
