

Dear Sun Pharma Science Foundation Science Scholar Fellowships Committee,

I, Gera Narendra, hereby voluntarily declare my commitment to work in public or private funded academic/research-based organizations for a minimum period of two years upon completion of my Ph.D. degree.

I recognize the value of academic and research-based organizations in driving innovation, advancing knowledge, and contributing to societal development. As a recipient of this award, I am fully aware of the importance of public and private investments in supporting education and research initiatives.

In light of the opportunities and resources provided to me during my academic journey, I believe it is my responsibility to give back to the academic and research community. By pledging to work in public or private funded academic/research-based organizations for at least two years after completing my studies, I aim to utilize my acquired knowledge, skills, and expertise to contribute meaningfully to ongoing research projects, mentor and inspire the next generation of researchers, and collaborate in interdisciplinary efforts to address pressing societal challenges.

I understand that this voluntary commitment is binding, and I am fully prepared to fulfill this obligation. I believe that my work during this period will not only serve the interests of the academic and research-based organizations but also align with my personal and professional aspirations to make a positive impact in the scientific community.

I hereby sign this voluntary declaration as a solemn commitment to work diligently and contribute effectively to the advancement of knowledge and research within the public or private funded academic/research-based organizations for the specified duration.

Thank you for considering my commitment, and I am eager to commence this next phase of my academic and professional journey with dedication and enthusiasm.

Sincerely,

Gera Narendra
Ph.D. Scholar
