I certify that the research work under references **Sci Rep.** 2023 Mar 6;13(1):3739 and **J Thorac Oncol.** 2022 Jun;17(6):793-805 has not been received any award in the past. For mapping immune landscape of small cell lung cancer, I acknowledge support of my colleagues from Medical Oncology, Pulmonary Medicine and Pathology. For the work on subtyping of non-small cell lung carcinoma on cytology, I am extremely grateful to cytology working group of pathology committee of International Association for Study of Lung Cancer (IASLC) for their academic collaboration on this very useful and timely project. Without teamwork it would have been extremely difficult to achieve success in these projects.
