TO WHOMSOEVER IT MAY CONCERN

Dr. Mathan Kumar Ramasubbu is currently pursuing MD (Pharmacology) as a junior resident (Academic) in All India Institute of Medical Sciences, Bhubaneswar, India. He has completed a research project titled *"A group sequential, response adaptive randomized double-blinded clinical trial to evaluate the safety and efficacy of an add-on combination of olanzapine and pregabalin for the prevention of chemotherapy-induced nausea and vomiting in patients receiving highly emetogenic chemotherapeutic regimen in a day-care setting"*.

Dr. Mathan is an enthusiastic learner, has keen observation skills, and has a natural curiosity to learn. He is undertaking a few other research projects with various study designs such as factorial, meta-analysis, network meta-analysis, and clinical trial simulations, etc. He has a good knowledge of various research designs and biostatistics using 'R' language and SPSS platforms. And he also helps other colleagues in the analysis and interpretation of data. I am happy to know that Sun Pharma has initiated the "Sun Pharma Science Foundation Science Scholar Awards 2023" to support brilliant and upcoming new generations in to stimulate their interest in scientific research. I know Dr. Mathan for the last 2.5 years and am quite optimistic about his potential to excel in his research career if he is provided with the right opportunities and impetus.

I find this candidature fit for this scholar award and **nominate him for this prestigious award.**

I wish Dr. Mathan the best in all his future endeavours.

Dr Debasish Hota
