To Whomsoever It May Concern

I am happy to give my highest possible recommendation for **Ms. Leena Sapra** for your prestigious “**Sun Pharma Science Foundation Award**”. She joined my Group in Dec. 2018 as a graduate student. She came with excellent academic records. After an initial period of training in animal experiments and immunology, Leena initiated the work in the field of “Immunoporosis”, a very novel field started by my group with immense clinical application in the field. I have found her motivated for research and with a strong desire to do high quality work. She proved this by working hard with proper planning of experiments with logical thinking. I have found her motivated for research with a strong desire to do high quality work.

Miss Leena is very intelligent, active, and enthusiastic about her scientific endeavors with strong inclination towards independent research. She consistently proves this by working hard with proper planning of experiments along with logical thinking. Leena is very intelligent (among top 1%), active and enthusiastic about his scientific endeavors with strong inclination towards independent research. She is always up to date with literature and has mastered different techniques in Cell Biology, Immunology, Molecular Biology, Animal Experiments, Clinical samples etc. which are essential to explore and understand diverse biological processes. She receives scientific suggestions about her work graciously and positively. She started working on her unique PhD project on “**To establish the role of “Breg-Treg-Th17” cell axis in probiotics mediated modulation of Bone Health : Immunoporosis**” from scratch and in a little span of time her work has already been recognized at both national (**G.P Talwar Young Scientist Award at 47th Immunology conference, India ; Best Poster at 1st Research day celebration at AIIMS, New Delhi, India** along with the **prestigious AIIMSONIAN Award for Best paper-2022**) and international levels (**Best Oral presentation award in conference organized by IUIS-IIS-FIMSA societies at Jaipur, Rajasthan, India**). She has published various research/ review papers in International journals of repute as 1st author such (*Frontiers in Immunology, Cells, Phytomedicine Plus, Scientific Reports, International reviews in Immunology, Osteoporosis International, Frontiers in Bioscience, PINSA, ISSRF, Atlas of Science*) along with five book chapters in a book from Springer Nature, Intech Open, Elsevier. She is an able speaker with excellent writing skills.

In short, I give Miss Leena my highest recommendation. She is one of my finest students and an outstanding researcher and would be undoubtedly the best candidate for this prestigious award.

Please feel free to contact me if you have any questions at rupeshk@aiims.edu
