### NOMINATION SPONSORSHIP (SUPERVISOR)

This is to bring to your kind notice that my PhD student Ms. Chanchal Bareja, is applying for Sun Pharma Science Foundation Scholar Award. I nominate her for this award as she is a keen learner and has completed her research project passionately. I put Ms Chanchal in top 5%. Her technical expertise in conceiving the Project on Identification of novel biomarkers for colorectal cancer till the execution shows her marvellous skills of fine planning and vast knowledge. This project paves a way from Bench side to Bed side in Translational Cancer Research. From getting her hands experienced in wet lab skills, along with bioinformatics pipeline, developing her hands on in programming languages, she is a diligent student. I am delighted at the very strong academic profile that she has developed for herself, and find definite pleasure and purpose in putting in a good word. Chanchal has a strong and very relevant curriculum vitae. All those details distill to just one singular fact – she has had an excellent and all-round academic grooming. Whatever research undertakings are listed in Chanchal's curriculum vitae, have all been possible entirely because of her own initiative and sense of purpose. Needless to say, Chanchal possesses a fairly decent quotient of scholastic values – motivation, analytical ability, language comprehension, ability for independent and logical thinking, and, more importantly, capacity for sustained hard work. I certainly have confidence in nominating her for this distinguished award.
