The GATE 2016 score is calculated using the formula

$$GATE\ Score = S_q + (S_r - S_q) \frac{(M - M_q)}{(M_t - M_q)}$$

where,

- S_q is the marks obtained by the candidate in the paper, mentioned on this scorecard in GATE 2016
- S_r is the qualifying marks for general category candidate in the paper
- M is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)
- 350, is the score assigned to M
- 900, is the score assigned to M_q

* In the GATE 2016 score formula, M_q is 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2016 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Inviting Institutes may conduct further tests and interviews for final selection.
