

Sun Pharma Science Foundation Research Fellowship, Nomination Form

To Whom It May Concern

I am writing to inform you that Dr Ritasman Baisya has successfully completed a three-year MD in General Medicine and a three-year DM training course in Clinical Immunology and Rheumatology at Medical College Kolkata and Nizam's Institute of Medical Sciences (NIMS), Hyderabad, India, respectively. He is currently serving as an Assistant Professor in the Rheumatology and Clinical Immunology Department at the All India Institute of Medical Sciences (AIIMS) in Kalyani, India.

Dr. Baisya's research interests focus on autoimmune diseases, particularly ankylosing spondylitis (AS). He currently has a proposal for a study on biomarker-mediated cardiovascular prediction and treatment response in AS, for which he has already obtained ethical approval from his institute. The title of the study is "To Develop a Multi-Biomarker Panel with Varied Mechanisms of Action to Predict Cardiovascular Risk in Early Axial Spondyloarthritis (SpA) Patients." I will supervise him for the proper execution of the research and immunological testing.

The Sun Pharma Science Foundation Research Fellowship would provide Dr. Baisya with an excellent opportunity to conduct this important research, which could significantly advance disease monitoring for ankylosing spondylitis patients facing a substantial healthcare burden in Eastern India.

I highly recommend Dr. Ritasman Baisya for the Sun Pharma Science Foundation Research Fellowship. He is a motivated and dedicated individual who will approach the study with commitment and focus.

Sincerely,

Dr Kalyan Goswami

Professor and Head , Biochemistry

Dean Academics

AIIMS Kalyani.
