TO WHOMSOEVER IT MAY CONCERN

Ms. Sanya Batheja has joined my research lab since her master's programme (M.Pharm) and she is pursuing Ph.D. under my supervision. She has the ability to work independently as well as in a team. She executed her research work on a project entitled "*Gemcitabine Loaded Galactosylated Albumin Nanoparticles for the Effective Treatment of Hepatocellular Carcinoma*" during the 2nd year of master's program under my co-supervision. Her attitude towards research and hard work was acknowledged by her recent publication in reputed international journals of Elsevier, BBA-General Subjects (Impact factor 3) and her research work is under review in International Journal of Pharmaceutics (Impact factor 5.8). She has published 2 review articles and 3 book chapters to her name. She is very determined towards the assigned tasks.

Sanya has the ability to excel in research and contribute to the welfare of society and mankind. I am fully convinced that Ms. Sanya could be a suitable candidate for the Sun Pharma Science Scholar Awards 2023 for Young Scientists.

With thanks and regards

Umesh Gupta
