This is to certify that the research work applied for the Sun Pharma Science Foundation Research Award 2023 has not been given any award in the past. The idea of generation of indigenous cut-offs for sarcopenia and sarcopenic obesity had been conceived by me. I had largely performed the research work applied for the Award. I had been a regular part of the research team visiting the community for door-to-door surveys. I had been involved in final data analysis and final dissemination of data via publications.
