Letter of Recommendation/Nomination

It is my pleasure and privilege to recommend and nominate **Dr Vishal Kumar**, Associate Professor of Orthopaedics at PGIMER, Chandigarh for this **prestigious Sun Pharma Science Foundation Research Awards, 2021**. I have known Vishal as postgraduate trainee, senior resident, senior research associate, assistant professor and now an associate professor in our department and he is one of the most outstanding young surgeon to emerge from this institution.

For the last several years, I have had the opportunity to watch Vishal at close quarters. Be it the research work, care of patients under his charge, in depth study of his discipline or his participation in academic activities, Vishal has always excelled. He is courteous and correct, of a pleasant disposition. He knows his responsibility and executes it well. Patients adore him for his easy accessibility, excellent communication skills and perfect bedside manner. He performs most of the orthopaedics procedure, in particular simple and complex trauma and spine surgeries with a high degree of confidence and finesse. He has been entrusted with many administrative roles in the department and he excels in these. I have always found him discharging his duties with utmost sincerity and integrity.

His diligence in the academic field is equally impressive. He has contributed several papers individually and in collaboration with his colleagues. He has a deep penchant for research and he has been investigator of several intramural and extramural research projects and been supervisor of many thesis and dissertation by the postgraduate trainees and super speciality subject trainee doctors. He has been a Senior Research Associate too. In addition to his day to day work as a Faculty, Vishal actively participates in faculty-students meeting and eagerly contributes to the discussion. He is always an advocate of students and trainees welfare and it is not surprising that fellow residents often turn to him for advice.

To summarise, Vishal has not only a brilliant research, academic background but he also possesses in abundance, the qualities of integrity, perseverance and sincerity. I strongly nominate and recommend him for this Research Award which he very well deserves and is the most suitable one in my view point.

(Dr. Sameer Aggarwal)
Deptt. of Orthopaedics
PGI, Chandigarh
