

To Whom It May Concern,

Subject: Ethical Clearance for Project

I am writing to address the requirement for ethical clearance in relation to my project submitted for consideration under Sun Pharma Science Foundation Award. The scope of my research involves DNA and Protein sequencing, which is limited to in vitro studies and computational analysis.

In India, research that involves non-human DNA, non-clinical protein engineering, and in vitro experimentation does not require ethical clearance as it does not involve human or animal subjects, nor does it have any direct implications on human health without clinical trials. My project strictly adheres to these guidelines and operates within the permissible framework that does not necessitate ethical review or approval.

Hence, I affirm that the nature of the research work proposed does not require ethical clearance as per the regulations and guidelines in India. Please feel free to contact me if any further clarification is needed.

Thank you for considering my application.

Sincerely,

Muhammad Sajeer P
