

Dr. Manjari Tripathi is actively engaged in clinical research focused on diverse research areas like drug resistant epilepsy, women with epilepsy and functional neuroimaging and programming of implantable devices in epilepsy. Under her supervision, two new procedures for epilepsy surgery were initiated - Hemispherotomy and Phase II evaluation with depth and grids to benefit people with intractable epilepsy. At AIIMS, her group comprises of a cohesive team of neurologists, neuropathologist, physiology, nuclear medicine, clinical psychology, and neuroradiology. The contributions of her team and the research personnel involved in the various projects supervised by Dr. Tripathi are hereby acknowledged.

The research work under reference has not been given any award in the past.

Dr. Manjari Tripathi
Professor
Department of Neurology,
AIIMS New Delhi - 110029
