

To whomsoever it may concern

I attest to the accuracy of the citation and fully endorse Dr. Parshad's outstanding research contributions.

Dr. Badri Parshad, an exceptional scientist and rising star in pharmaceutical science, has rapidly established himself as a leading researcher with significant contributions early in his career. With an impressive h-index of 14 and over 550 citations as per Google Scholar, his work is widely recognized and respected in the field. He has published over 35 peer-reviewed research articles, including seven as the first author and four as the corresponding author. His research shows a clear upward trajectory, with high-impact publications in prestigious international journals, including Angewandte Chemie, ACS Nano, Science Advances, Bioactive Materials, and Journal of Controlled Release. Dr. Parshad has also co-authored one international patent application, four book chapters, and one conference proceeding. His international reputation is reflected in his numerous invited lectures and oral presentations at prestigious conferences such as Military Health System Research Symposium (MHSRS) and the European Conference on Biomedical Optics.

I am confident that Dr. Parshad's research achievements will continue to make a significant impact on the field of pharmaceutical science.

Yours Sincerely

Prof Ramesh Chandra
(Vice-Chancellor, MSBU)
