Dr Goswami has been an active researcher engaged in research on vitamin D. For his early pathbreaking studies in 1999-2000 on first documentation of vitamin D deficiency in urban Indians and pathogenesis of hypoparathyroidism he was awarded Shri Shanti Swarup Bhatnagar Prize by the CSIR in 2008. His work has lead a vast number of studies on prevalence of vitamin D deficiency in India.

Since 2008, Dr R Goswami has been actively contributing on the extent of problem of vitamin D deficiency in India. For the last 10 years, Dr Ravinder Goswami has been actively engaged in documenting the unique aspects related to management and complication of idiopathic hypoparathyroidism including development of ex-vivo model for basal ganglia calcification. These are the original work for which he has not received any recognition. Dr Goswami conceptualized these study and led the team to enrol the subjects, their investigations, analysis and publishing as corresponding author. All the work was carried out in Dr R Goswami laboratory at AIIMS, New Delhi.
