Dear Committee Members,

This letter is to confirm that Ms. Seema Kuldeep has been a dedicated doctoral student in our laboratory at the Department of Biological Sciences and Bioengineering, IIT Kanpur, since July 2021. She has been meticulously investigating the role of macrophage GPCR signaling in immune cells, particularly in the context of diabetes and obesity. Her research is focused on unraveling the molecular mechanisms by which tissue-resident macrophage GPCR signaling influences these conditions, with the ultimate goal of contributing to the development of more effective therapeutic interventions. Over the past three years, Seema has independently generated all the data presented in her research.

Sincerely,
Sai P Pydi
