

## TO WHOMSOEVER IT MAY CONCERN

It gives me immense pleasure to offer this letter of reference of **Mrs. Desy TM.** She has been pursuing her PhD since last one year. She is competent to carryout research sincerely.

Desy has shown extremely high level of intellectual curiosity, critical thinking and self motivation throughout the time I have known her. She is very academically oriented and has maintained top marks throughout her coursework despite facing a challenging curriculum. Additionally she has shown great promise in the field of research. As a guide, I supervised her during the research activities. I believe her curiosity, hard work and intelligence will make her an able researcher.

She is able to pick up new techniques with great ease, and has an eager mind that seeks to understand everything that she is doing. She has a tremendous capacity for independent work and desire to better the lives of others.

She has been working as Senior Research Fellow in my project, 'Influence of UGT1A3 Gene polymorphism on Sodium Valproate Monotherapy in Pediatric Epilepsy'. I strongly recommend her for Sun Pharma science foundation science scholar award as it may be useful in enhancing her research experience and interests.

Sincerely,

  
Dr Usha Adiga
