

Advanced Centre for Treatment Research & Education in Cancer
Tata Memorial Centre

Dr. Abhijit De MPH, PhD
Principal Investigator & Scientific Officer 'G'

September 29, 2021

To whomsoever it may concern,

The work submitted for the Sun Pharma Science Scholar Award entitled "**Patient derived-driver mutations in the interaction domain of HER2 changes the dynamics of HER2 interaction, thereby changing the targeted therapy response in breast cancer**" till date didn't involve any patient sample collection, thereby not require clearance from the Institutional Ethics Committee.

[Dr. Abhijit De]
