Undertaking for Sun Pharma Science Foundation Research Award- Medical Sciences

This is to certify that that the research work under reference has not been given any award in the past. I have been working in the field of multiple myeloma (MM) for past several years and the cumulative work over the years is presented for this award. This work has been possible through the financial support from DST and especially DBT on the research project “Unit of Excellence on Cancer Research on Multiple Myeloma”. I have contributed as a Principal Investigator and team leader on these projects and contributed substantially to the research work and the manuscripts.

 डॉ. रितु गुप्ता / Dr. RITU GUPTA
