TO WHOMSOEVER IT MAY CONCERN

Ms. Sanya Batheja has joined my research lab since her master's programme (M.Pharm) and she is pursuing Ph.D. under my supervision. She has the ability to work independently as well as in a team. She executed her research work on a project entitled "*Galactosylated Albumin Nanoparticles for Improved Protein Binding, Stability and Effective Delivery of Gemcitabine*" during the dissertation period of master's program under my co-supervision. She got enrolled in the Ph.D. program of the university again under my direct supervision on 21st October, 2021. In her Ph.D., she is currently working on the project entitled "*Nanocarrier Based Formulation for the Effective Management of the Glioblastoma Multiforme*". Her attitude towards research and hard work was acknowledged by her recent publication in reputed international journals of Elsevier, *Drug Discovery Today* (Impact factor 6.5), *Journal of Drug Delivery Science and Technology* (Impact factor 4.5), and *BBA-General Subjects* (Impact factor 2.8). The proposed research work is under review in *Biochemical Pharmacology* (Impact factor 5.3). She has published 1 research article, 3 review articles and 5 book chapters to her name. She is very determined towards the assigned tasks.

Sanya has the ability to excel in research and contribute to the welfare of society and mankind. I am fully convinced that Ms. Sanya could be a suitable candidate for the *Sun Pharma Science Foundation: Science Scholar Fellowships 2024* for Young Scientists.

With thanks and regards

Umesh Gupta
