- Health Economics
- Rehabilitation
- Geriatrics

Internship

I found the internship at Jan Swasthya Sahyog, Ganiyari, and Bilaspur to be the most interesting part of my whole MPH course. I have learned a lot many things, overall understanding of public health management, coordination, and gaining personal confidence and leadership experience. Practically explored public health. Learned about the implementation of the various health program at the grass-root level. Learned about current and potential sources of funding for the NGO to support public health programs. The elemental issues of rural India which I would have never encountered if I won't have got this opportunity. I was greatly influenced by the low-cost and effective health program that provides both preventive and curative services in the tribal and rural areas of Bilaspur and the surrounding areas of Chhattisgarh
